Performance-Based Optimization of Structures (Spon Research)

Qing Quan Liang

Performance-Based Optimization of Structures (Spon Research) Qing Quan Liang

Performance-Based Optimization of Structures introduces a method to bridge the gap between structural optimization theory and its practical application to structural engineering. The Performance-Based Optimization (PBO) method combines modern structural optimisation theory with performance based design concepts to produce a powerful technique for use in structural design. This book provides the latest PBO techniques for achieving optimal topologies and shapes of continuum structures with stress, displacement and mean compliance constraints.

The emphasis is strongly placed on practical applications of automated PBO techniques to the strut-and-tie modelling of structural concrete, which includes reinforced and prestressed concrete structures. Basic concepts underlying the development of strut-and-tie models, design optimization procedure, and detailing of structural concrete are described in detail. Alternative approaches to topology optimization are also introduced. The book contains numerous practical design examples illustrating the nature of the load transfer mechanism of structures.

From reader reviews:

Nathan Wilson:

This Performance-Based Optimization of Structures (Spon Research) book is simply not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is actually information inside this publication incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. This Performance-Based Optimization of Structures (Spon Research) without we recognize teach the one who looking at it become critical in contemplating and analyzing. Don't end up being worry Performance-Based Optimization of Structures (Spon Research) can bring if you are and not make your tote space or bookshelves' become full because you can have it in your lovely laptop even cell phone. This Performance-Based Optimization of Structures (Spon Research) having great arrangement in word along with layout, so you will not feel uninterested in reading.

Juan Crowe:

The feeling that you get from Performance-Based Optimization of Structures (Spon Research) will be the more deep you excavating the information that hide in the words the more you get serious about reading it. It does not mean that this book is hard to comprehend but Performance-Based Optimization of Structures (Spon Research) giving you joy feeling of reading. The writer conveys their point in specific way that can be understood by means of anyone who read the idea because the author of this e-book is well-known enough. That book also makes your current vocabulary increase well. Therefore it is easy to understand then can go along, both in printed or e-book style are available. We advise you for having this particular Performance-Based Optimization of Structures (Spon Research) instantly.

Michael Crew:

Your reading sixth sense will not betray you, why because this Performance-Based Optimization of Structures (Spon Research) e-book written by well-known writer who knows well how to make book that may be understand by anyone who read the book. Written in good manner for you, dripping every ideas and producing skill only for eliminate your personal hunger then you still hesitation Performance-Based Optimization of Structures (Spon Research) as good book not merely by the cover but also from the content. This is one book that can break don't judge book by its handle, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your reading sixth sense already alerted you so why you have to listening to an additional sixth sense.

Michael Robinson:

Don't be worry if you are afraid that this book can filled the space in your house, you could have it in e-book way, more simple and reachable. This Performance-Based Optimization of Structures (Spon Research) can give you a lot of friends because by you looking at this one book you have thing that they don't and make you more like an interesting person. This kind of book can be one of a step for you to get success. This book

offer you information that might be your friend doesn't recognize, by knowing more than different make you to be great men and women. So , why hesitate? We need to have Performance-Based Optimization of Structures (Spon Research).
