Robotic Exploration of the Solar System (Springer Praxis Books)

Paolo Ulivi, David M. Harland

Robotic Exploration of the Solar System (Springer Praxis Books) Paolo Ulivi, David M. Harland
Paolo Ulivi and David Harland provide in *Robotic Exploration of the Solar System* a detailed history of unmanned missions of exploration of our Solar System. As in their previous book *Lunar Exploration*, the subject will be treated wherever possible from an engineering and scientific standpoint. Technical descriptions of the spacecraft, of their mission designs and of instrumentations will be provided. Scientific results will be discussed in considerable depth, together with details of mission management. The book will be comprehensive, covering missions and results from the 1950s until the present day, and some of the latest missions and their results will appear in a popular science book for the first time. The authors will also cover many unflown missions, providing an indication of the ideas that proved to be unfulfilled at the time but which may still be proven and useful in the future. The project will deliver three volumes totaling over 1000 pages, providing comprehensive coverage of the topic.

From reader reviews:

Aline Moran:

With other case, little folks like to read book Robotic Exploration of the Solar System (Springer Praxis Books). You can choose the best book if you love reading a book. As long as we know about how is important any book Robotic Exploration of the Solar System (Springer Praxis Books). You can add knowledge and of course you can around the world by way of a book. Absolutely right, simply because from book you can learn everything! From your country until foreign or abroad you will be known. About simple issue until wonderful thing you could know that. In this era, we could open a book as well as searching by internet gadget. It is called e-book. You should use it when you feel weary to go to the library. Let's examine.

Shirley Gilliam:

Information is provisions for those to get better life, information currently can get by anyone in everywhere. The information can be a expertise or any news even restricted. What people must be consider any time those information which is from the former life are challenging to be find than now is taking seriously which one is acceptable to believe or which one the resource are convinced. If you obtain the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take Robotic Exploration of the Solar System (Springer Praxis Books) as the daily resource information.

Heather Delph:

People live in this new time of lifestyle always make an effort to and must have the free time or they will get lot of stress from both daily life and work. So , if we ask do people have free time, we will say absolutely yes. People is human not just a robot. Then we inquire again, what kind of activity do you have when the spare time coming to a person of course your answer will certainly unlimited right. Then ever try this one, reading textbooks. It can be your alternative with spending your spare time, often the book you have read is actually Robotic Exploration of the Solar System (Springer Praxis Books).

Elizabeth Maez:

In this era which is the greater particular person or who has ability in doing something more are more important than other. Do you want to become considered one of it? It is just simple way to have that. What you should do is just spending your time little but quite enough to enjoy a look at some books. Among the books in the top list in your reading list will be Robotic Exploration of the Solar System (Springer Praxis Books). This book which is qualified as The Hungry Hills can get you closer in getting precious person. By looking right up and review this book you can get many advantages.
