In 1984, a Moroccan national named Abdelkrim Belachheb walked into Iannis Restaurant, a trendy Dallas nightclub, and gunned down seven people. Six died. Despite the fact that the crimes occurred in a state that prides itself on being tough on criminals, the death penalty was not an option for the Belachheb jury. Even though he had committed six murders, and his guilt was never in question (despite his insanity defense), his crimes were not capital murders under 1984 statutes. As a direct result of this crime, during the 1985 regular session the Texas Legislature passed House Bill 8--the "multiple murder" statute--to make serial killing and mass murder capital crimes. Belachheb's case serves as an excellent example to explore capital punishment and the insanity defense. Furthermore, Belachheb's easy entry into the United States (despite his violent record in Europe) highlights our contemporary fear over lax immigration screening and subsequent terrorism. The case is unique in that debate usually arises from an execution. Belachheb was given life imprisonment and is currently under maximum security--a fate some would argue is "worse than death." He is scheduled to have his first parole hearing in 2004, the twentieth anniversary of his crime. "This is a superbly written book about an extraordinary case whose significance ranged from influencing death penalty legislation to directly foreshadowing the types of security lapses that led to September 11th. It is among the best I have read in its genre."--Bob Brown, ABC news correspondent for 20/20
