Analytical Modeling of Heterogeneous Cellular Networks: Geometry, Coverage, and Capacity

Sayandev Mukherjee

This self-contained introduction shows how stochastic geometry techniques can be used for studying the behaviour of heterogeneous cellular networks (HCNs). The unified treatment of analytic results and approaches, collected for the first time in a single volume, includes the mathematical tools and techniques used to derive them. A single canonical problem formulation encompassing the analytic derivation of Signal to Interference plus Noise Ratio (SINR) distribution in the most widely-used deployment scenarios is presented, together with applications to systems based on the 3GPP-LTE standard, and with implications of these analyses on the design of HCNs. An outline of the different releases of the LTE standard and the features relevant to HCNs is also provided. A valuable reference for industry practitioners looking to improve the speed and efficiency of their network design and optimization workflow, and for graduate students and researchers seeking tractable analytical results for performance metrics in wireless HCNs.

From reader reviews:

Anthony Sierra:

Reading a e-book tends to be new life style in this era globalization. With studying you can get a lot of information that may give you benefit in your life. Having book everyone in this world can share their idea. Books can also inspire a lot of people. A lot of author can inspire their very own reader with their story as well as their experience. Not only the storyline that share in the publications. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach your children, there are many kinds of book that you can get now. The authors on earth always try to improve their talent in writing, they also doing some investigation before they write to their book. One of them is this Analytical Modeling of Heterogeneous Cellular Networks: Geometry, Coverage, and Capacity.

Jerrod Spicher:

Your reading 6th sense will not betray you actually, why because this Analytical Modeling of Heterogeneous Cellular Networks: Geometry, Coverage, and Capacity reserve written by well-known writer whose to say well how to make book that could be understand by anyone who all read the book. Written inside good manner for you, dripping every ideas and publishing skill only for eliminate your own personal hunger then you still doubt Analytical Modeling of Heterogeneous Cellular Networks: Geometry, Coverage, and Capacity as good book not simply by the cover but also by content. This is one book that can break don't determine book by its deal with, so do you still needing one more sixth sense to pick this specific!?! Oh come on your examining sixth sense already alerted you so why you have to listening to another sixth sense.

Louis Patrick:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you will get it in e-book approach, more simple and reachable. This particular Analytical Modeling of Heterogeneous Cellular Networks: Geometry, Coverage, and Capacity can give you a lot of good friends because by you taking a look at this one book you have factor that they don't and make you actually more like an interesting person. This particular book can be one of a step for you to get success. This e-book offer you information that might be your friend doesn't understand, by knowing more than different make you to be great men and women. So , why hesitate? Let's have Analytical Modeling of Heterogeneous Cellular Networks: Geometry, Coverage, and Capacity.

Ruth Vigue:

Reading a e-book make you to get more knowledge from that. You can take knowledge and information from your book. Book is written or printed or outlined from each source which filled update of news. In this particular modern era like right now, many ways to get information are available for anyone. From media social just like newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just

looking for the Analytical Modeling of Heterogeneous Cellular Networks: Geometry, Coverage, and Capacity when you essential it?
