Microcontroller Projects in C for the 8051 Dogan Ibrahim

This book is a thoroughly practical way to explore the 8051 and discover C programming through project work. Through graded projects, Dogan Ibrahim introduces the reader to the fundamentals of microelectronics, the 8051 family, programming in C, and the use of a C compiler. The specific device used for examples is the AT89C2051 - a small, economical chip with re-writable memory, readily available from the major component suppliers.

A working knowledge of microcontrollers, and how to program them, is essential for all students of electronics. In this rapidly expanding field many students and professionals at all levels need to get up to speed with practical microcontroller applications. Their rapid fall in price has made microcontrollers the most exciting and accessible new development in electronics for years - rendering them equally popular with engineers, electronics hobbyists and teachers looking for a fresh range of projects.

Microcontroller Projects in C for the 8051 is an ideal resource for self-study as well as providing an interesting, enjoyable and easily mastered alternative to more theoretical textbooks.

Dogan Ibrahim has been Associate Professor and Head of Department at the Near East University, Cyprus, lecturer at South Bank University, London, Principal Research Engineer at GEC Hirst Research Centre, and is now a hardware and software systems consultant to London's Traffic Control Systems Unit.

Practical projects that enable students and practitioners to get up and running straight away with 8051 microcontrollers

A hands-on introduction to practical C programming

A wealth of project ideas for students and enthusiasts

From reader reviews:

Yasmin Parker:

This Microcontroller Projects in C for the 8051 book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is usually information inside this reserve incredible fresh, you will get details which is getting deeper anyone read a lot of information you will get. This kind of Microcontroller Projects in C for the 8051 without we recognize teach the one who studying it become critical in imagining and analyzing. Don't be worry Microcontroller Projects in C for the 8051 can bring any time you are and not make your handbag space or bookshelves' turn into full because you can have it in the lovely laptop even cellphone. This Microcontroller Projects in C for the 8051 having fine arrangement in word along with layout, so you will not sense uninterested in reading.

Bethany Eng:

Now a day people that Living in the era everywhere everything reachable by connect with the internet and the resources included can be true or not require people to be aware of each info they get. How people have to be smart in obtaining any information nowadays? Of course the correct answer is reading a book. Studying a book can help persons out of this uncertainty Information specifically this Microcontroller Projects in C for the 8051 book because this book offers you rich data and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it you know.

Mark Hoffman:

Spent a free time and energy to be fun activity to accomplish! A lot of people spent their free time with their family, or their particular friends. Usually they carrying out activity like watching television, gonna beach, or picnic from the park. They actually doing same task every week. Do you feel it? Will you something different to fill your own free time/ holiday? Could possibly be reading a book may be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try look for book, may be the e-book untitled Microcontroller Projects in C for the 8051 can be very good book to read. May be it is usually best activity to you.

James Stevens:

Reading a book being new life style in this calendar year; every people loves to learn a book. When you study a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what forms of book that you have read. If you need to get information about your examine, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, as well as soon. The Microcontroller Projects in C for the 8051 will give you a new experience in looking at a book.
