Biohydrogen: Chapter 11. Fermentative Biohydrogen Production from Solid Wastes Mi-Sun Kim, Jaehwan Cha, Dong-Hoon Kim

This chapter provides an up-to-date overview of fermentative hydrogen production from organic solid wastes. Numerous recent works have reported that abundant organic solid wastes from households, agriculture, and industry are potential feedstocks for hydrogen production, which can be exploited for waste management and energy production at the same time. However, the hydrogen production potential varies widely depending on the substrate components. This chapter thus deals with the characteristics of various organic solid wastes. Several effective strategies, including hydrolysis and sterilization methods to render organic solid wastes as a feasible substrate for effective hydrogen production, are presented. Hydrogen production is not only restricted by the composition of organic wastes, but also is dependent on the operational conditions. Thus, key parameters affecting hydrogen production, such as pH, temperature, nutrient supplementation, and hydraulic retention time, are reviewed. In addition, reactor types suitable for enhancing hydrogen production are also discussed.

From reader reviews:

Michael Thompson:

The book Biohydrogen: Chapter 11. Fermentative Biohydrogen Production from Solid Wastes will bring you to definitely the new experience of reading the book. The author style to clarify the idea is very unique. In the event you try to find new book to read, this book very suited to you. The book Biohydrogen: Chapter 11. Fermentative Biohydrogen Production from Solid Wastes is much recommended to you to learn. You can also get the e-book in the official web site, so you can more easily to read the book.

Delores Villarreal:

Exactly why? Because this Biohydrogen: Chapter 11. Fermentative Biohydrogen Production from Solid Wastes is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will shock you with the secret that inside. Reading this book close to it was fantastic author who write the book in such wonderful way makes the content inside easier to understand, entertaining way but still convey the meaning entirely. Then you are experiencing problem with the book than can satisfy your short period of time to read it because all this time you only find book that need more time to be learn. Biohydrogen: Chapter 11. Fermentative Biohydrogen Production from Solid Wastes can be your answer because it can be read by an individual who have those short time problems.

Ruth Davis:

A lot of people said that they feel weary when they reading a publication. They are directly felt that when they get a half portions of the book. You can choose the book Biohydrogen: Chapter 11. Fermentative Biohydrogen Production from Solid Wastes to make your personal reading is interesting. Your current skill of reading skill is developing when you similar to reading. Try to choose basic book to make you enjoy you just read it and mingle the opinion about book and reading through especially. It is to be 1st opinion for you to like to open up a book and read it. Beside that the e-book Biohydrogen: Chapter 11. Fermentative Biohydrogen Production from Solid Wastes can to be your new friend when you're truly feel alone and confuse with the information must you're doing of these time.
