Learning Laravel 4 Application Development Hardik Dangar

In Detail

Laravel 4 is a clean and classy framework for PHP web development. It attempts to ease the development of web applications by simplifying the common tasks required in the majority of web projects, such as authentication, routing, sessions, and caching.

"Learning Laravel 4 Application Development" uses a step-by-step approach to teach you how to build real-world web applications. You will learn how to create a web application from scratch as well as how to create and use packages to build reusable components to be used in your projects.

This book begins by familiarizing you with MVC concepts as well as the Laravel 4 framework. From there, it moves on to the creation of the frontend and backend of your web application. As you progress through the book, you will learn how you can authenticate users as well as develop RESTful APIs. You will also learn how to configure, optimize, and secure your applications. Lastly, it teaches you how to deploy your applications using different approaches like Git, FTP, and SSH.

Laravel 4 Application Development will teach you everything you need to know to create accessible real-world web applications quickly and efficiently.

Approach

This book is written in a simple and easy-to-understand manner, with each chapter contributing as a standalone project that will give you as a reader something to reflect on as you're learning.

Who this book is for

This book is aimed at amateur PHP developers with a desire to get a firm understanding of the Laravel 4 framework. Basic knowledge of PHP will be helpful, however in-depth knowledge is not a must.
