Managing the Critically Ill Child

Managing the Critically Ill Child

The management of critically ill or injured children has become increasingly specialised; nevertheless, the first point of contact for many sick children remains their nearest hospital. Here, the initial management will usually involve emergency department doctors, anaesthetists and paediatricians. *Managing the Critically Ill Child* is written by anaesthetists and emergency department physicians who currently have a significant paediatric practice. It provides a straightforward guide for non-paediatricians encountering acutely unwell or injured children. This book helps readers apply their knowledge from adult practice to children, and avoid pitfalls where the approaches in paediatrics differ. Written in a practical, concise format, *Managing the Critically Ill Child* guides physicians beyond the initial emergency algorithms and is essential reading for physicians and trainees in emergency medicine, anaesthesia and intensive care who may be asked to look after a child.
